

intrinsic ligands §3.1	IP ₃	Ca ²⁺ (co-agonist)	ATP	
phosphorylation §4.1	PKA	PKC / CaMKII	PKG	
protein partners §4.2	Bcl-2 (BH4)	Mcl-1	Bcl-X _L	BIRD-2 peptide
	IRBIT	CaBPs	calmodulin	
luminal / ER §4.3	ERp44 (redox, pH)			
turnover §4.6	ubiquitination	RNF170 (ERAD)		
disease proteins §4.7	presenilins (FAD)			

increases release

biphasic

decreases release

sign depends on paralogue / cell type
